STEADY PROMPTER

Speak to the lens, not the page.

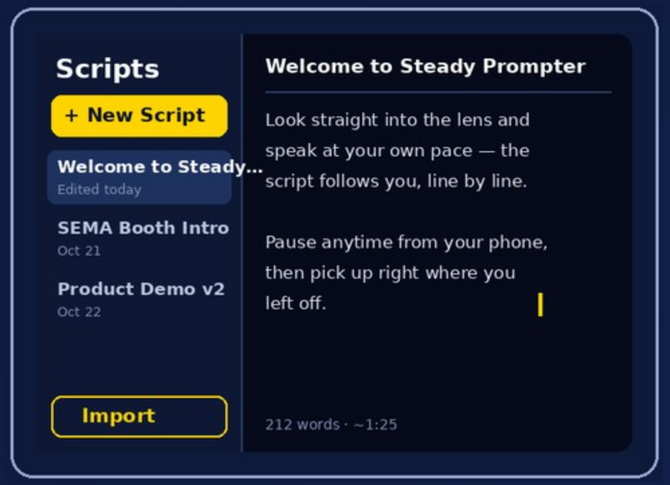

The how-to guide for iPhone and iPad

- **Eyes on the lens** while you read your script.
- **Free to start:** no watermark, no account.
- **Pro is $19.99, once.** No subscription.

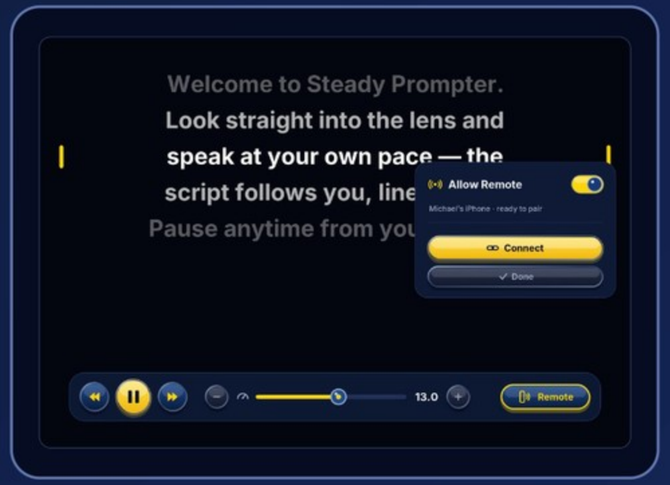

Questions or feedback · steadyprompterapp@gmail.com

One app: your script, screen and remote

Scripts
Write or import

Paste, type, or import from Pages, Word or a text file, then revise anytime.

Prompter
iPhone, iPad

Your script scrolls on screen while you speak. Play, pause, jump and set the speed.

Remote
Your phone in hand

Pair a phone with a 4-digit code and run the prompter from across the room.

Every control sits in one bar

While you record, the bar along the bottom of the prompter keeps the scroll, the speed and the remote in reach.

Play / Pause
Start or stop the scroll.

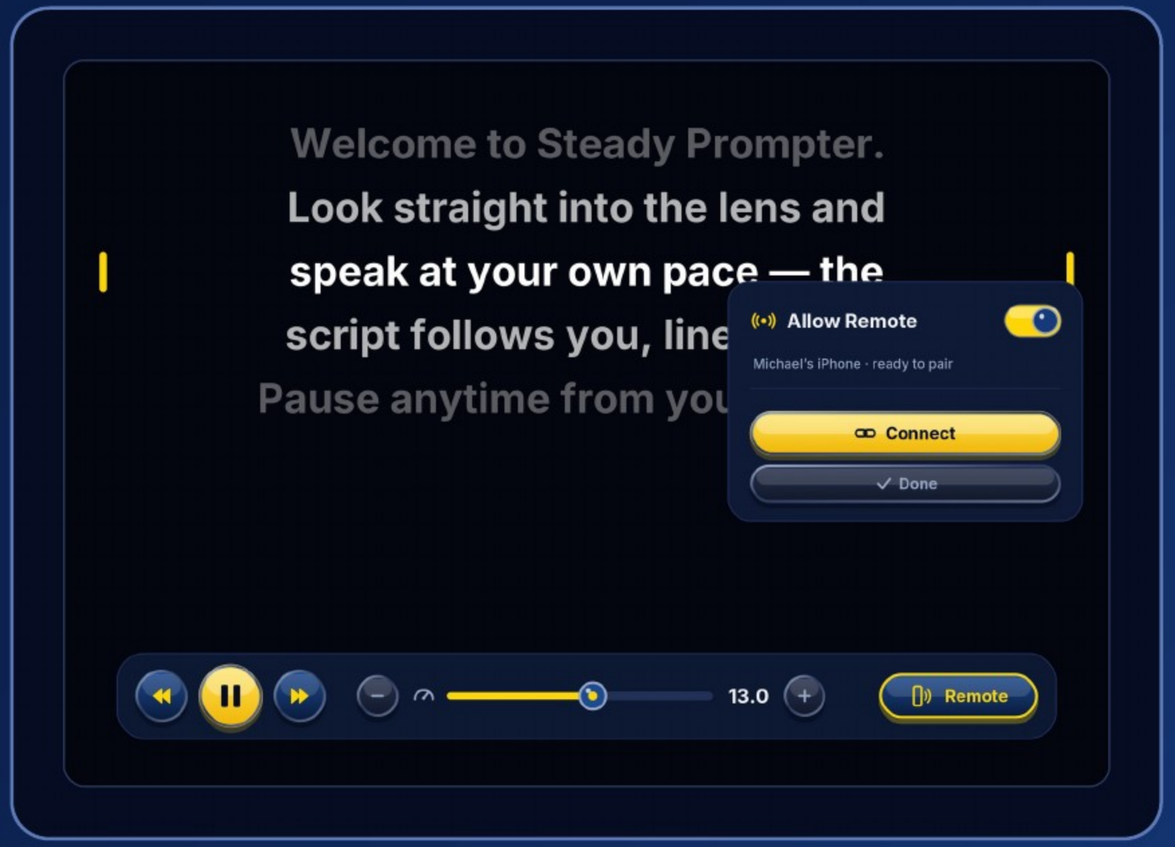

Back / Forward
Jump back or ahead in the script.

Speed steppers and slider
Tap - or + to step, or drag the slider.

Remote
Opens the yellow Remote popover.

The prompter screen, with the Remote popover open

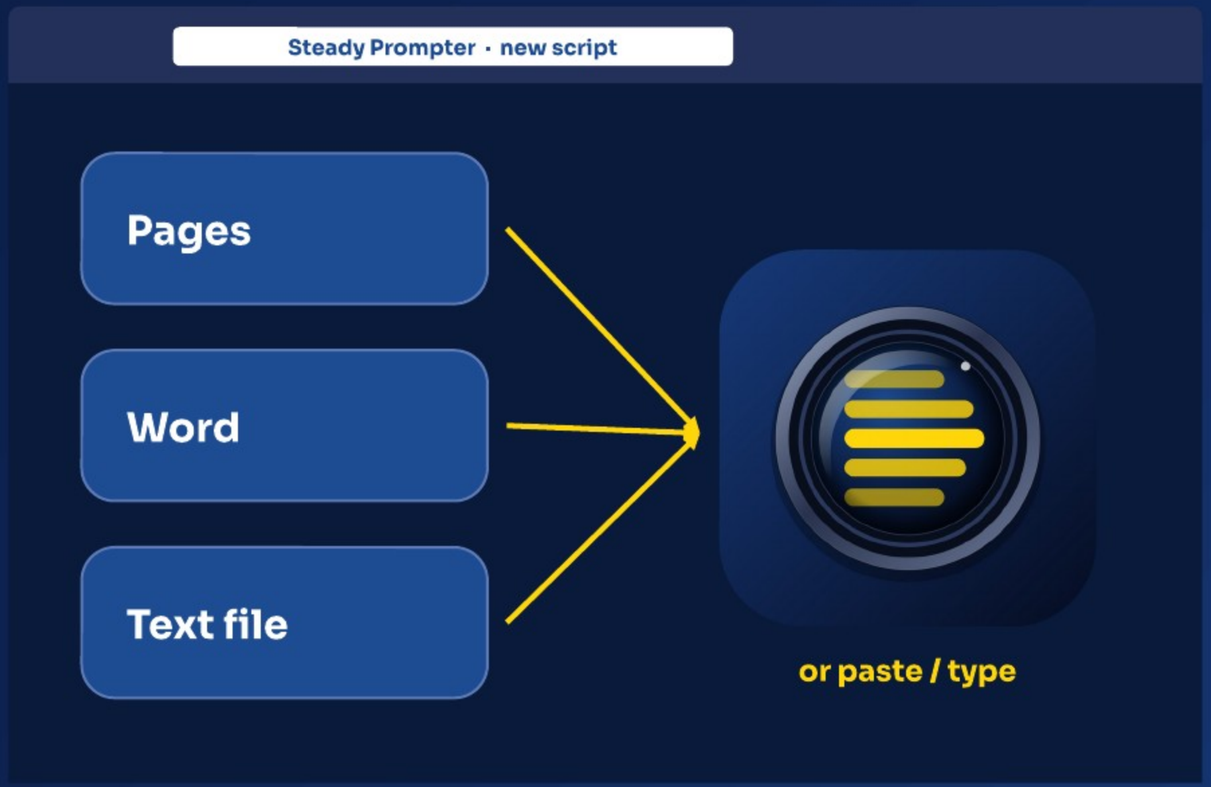

Add a script three ways

Start from wherever your words already live.

1. **Paste**
   Copy your script and paste it in.

2. **Type**
   Write it right in the app.

3. **Import**
   Bring in a Pages, Word or text file.

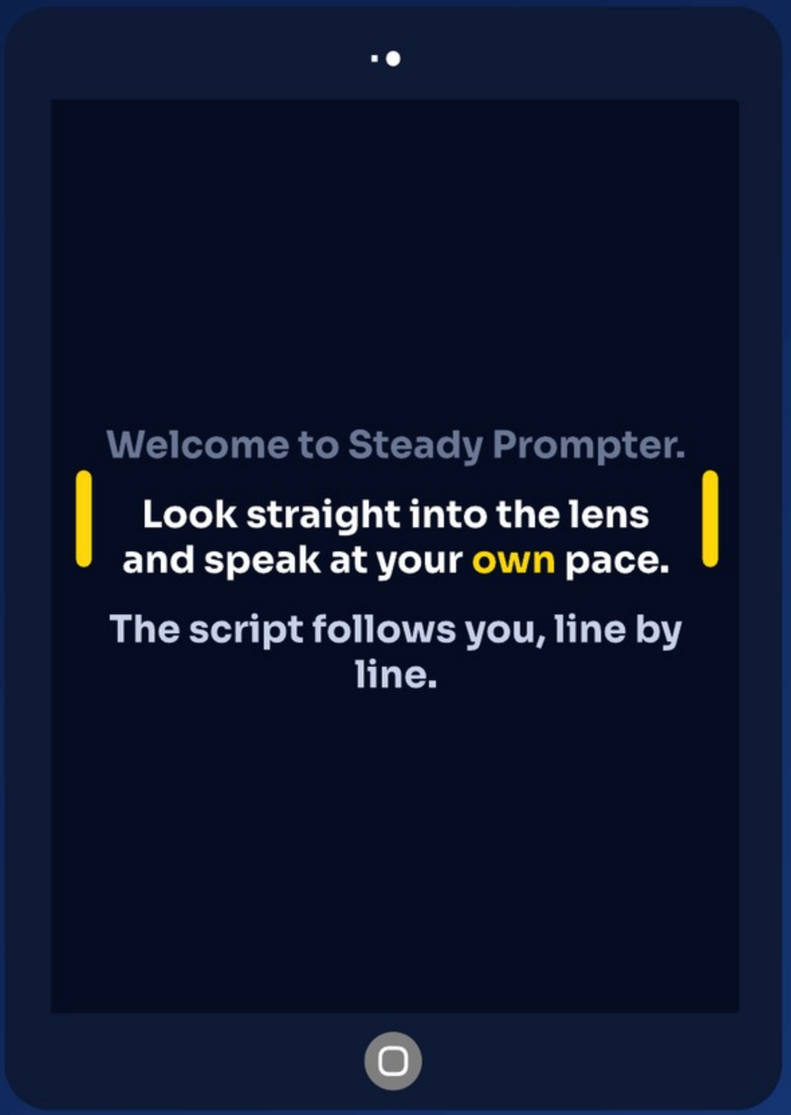

Revise a script anytime

Scripts change. Edit yours right in the editor, and start a line with # or ## to make it a chapter.

The word and chapter chips update as you type.

REVISE IN 3 STEPS

1. **Open the editor**
2. **Change the words**
3. **Add # or ## chapters**

One device reads, another drives

iPhone and iPad can each be the display or the remote.

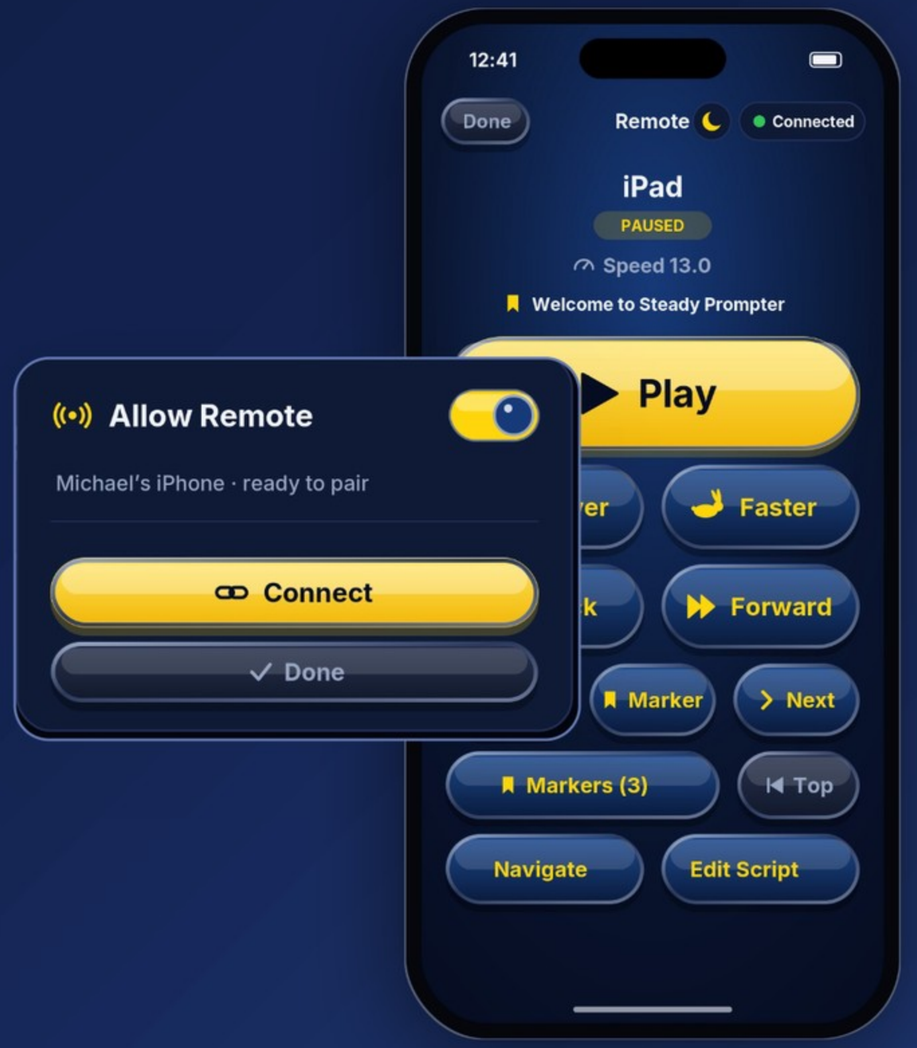

Use a second iPhone or iPad nearby as the remote

PRO **Remote pairing is a Pro feature.** Keep both devices nearby with Wi-Fi and Bluetooth on.

Pair the remote in 4 steps

Link your remote device to the prompter once, then run the whole read from across the room.

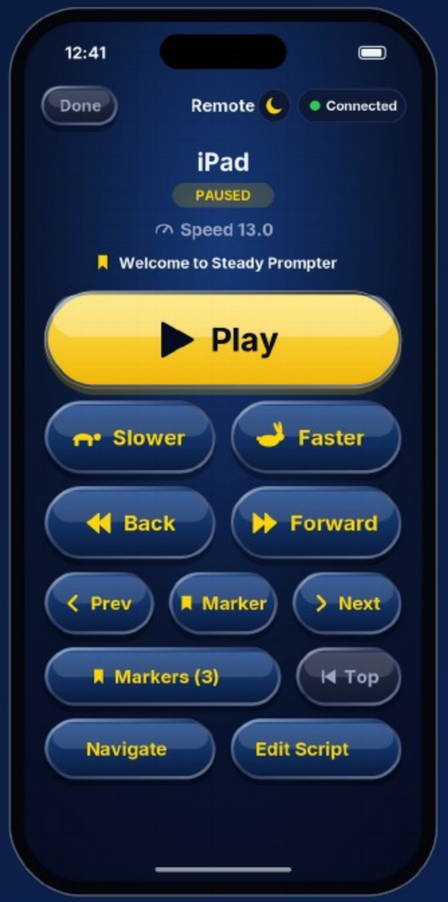

1. **Open the prompter**
   On the prompter device, press play, then tap the yellow Remote capsule in the control panel.
2. **Allow Remote**
   Turn it on to get a 4-digit code.
3. **Pick the prompter**
   On the remote, tap the remote icon in the script list, then tap the prompter.
4. **Enter the code**
   Type the 4-digit code to connect.

New look: dark navy, white and yellow. Tap the sun/moon toggle at the top for a light look.

The remote, button by button

Pair once and the device in your hand runs the whole read. Remote pairing is a Pro feature.

1 Open it

- On the prompter device, tap the yellow Remote capsule. Allow Remote gives a 4-digit code.
- On the remote, tap the remote icon in the script list header, then enter the code.
- Keep both devices nearby with Wi-Fi and Bluetooth on.

2 Run the read

- Play / Pause starts or stops the scroll.
- Back / Forward jumps back or ahead in the script.
- Slower / Faster sets the speed.

3 Jump with markers

- The Prev / Marker / Next row adds a marker or steps between markers.
- Markers (N) lists them with timecodes. Tap one to jump.

4 While paused

- Navigate: a drag strip plus Line and Page up/down buttons.
- Edit Script: edit the whole script on the remote. Save updates the prompter, keeping your place and markers.
- Both are greyed out while the script plays.

Look: dark navy, white and yellow by default. Tap the sun/moon toggle for a light look.

Markers, device by device

Add a marker, name it, then jump straight to it. **Markers are free on every device.**

iPad

TABLET

1. **Add**
   Tap the Add Marker pill in the editor, the bookmark button in the prompter control panel, or the top bookmark.
2. **Edit**
   The Edit Marker sheet sets the Label and the Timecode, or tap Use estimated time.
3. **Find**
   The Markers panel sits on the right of the editor. In the prompter, a slim list sits on the right edge while paused.
4. **Jump**
   Tap any marker to jump to it. With a keyboard: **M**, **Tab** and **Shift-Tab** (Pro).

iPhone

PHONE

1. **Add**
   Tap the Add Marker pill in the editor, the bookmark button in the prompter control panel, or the top bookmark.
2. **Edit**
   The Edit Marker sheet sets the Label and the Timecode, or tap Use estimated time.
3. **Find**
   In the editor, tap the ‘N markers’ chip. In the prompter, a slim list sits on the right edge while paused.
4. **Jump**
   Tap any marker in a list to jump straight to it.

On the remote: the Prev / Marker / Next row adds a marker or steps between them. Markers (N) lists them with timecodes; tap one to jump.

Markers: Free vs Pro

Everything you need to mark and jump is free. Pro adds speed: shortcuts and the remote.

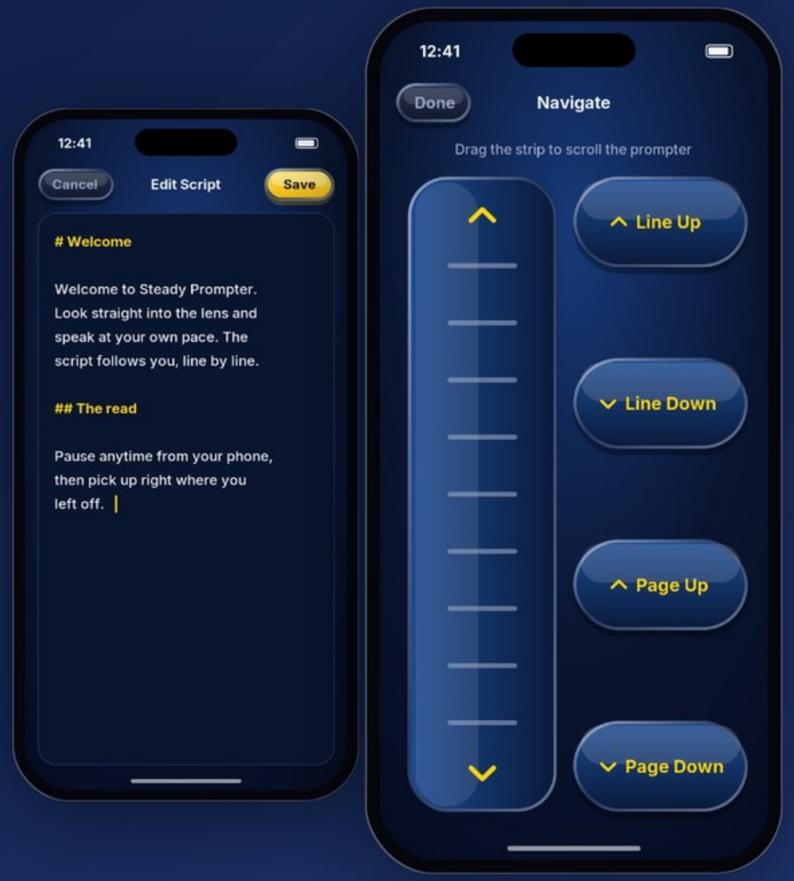

FEATURE	Free	Pro $19.99 one-time
Add markers Add Marker pill, control-panel bookmark or top bookmark.	✓	✓
Name them Give each marker a Label.	✓	✓
Timecodes MM:SS or HH:MM:SS, or Use estimated time.	✓	✓
Marker lists Editor panel or 'N markers' chip, plus the prompter list.	✓	✓
Tap to jump Tap any marker in any list to go straight to it.	✓	✓
M to add a marker Drop a marker from a keyboard.	—	✓
Tab / Shift-Tab Jump to the next or previous marker.	—	✓
Markers from the remote Prev / Marker / Next row and the Markers (N) list.	—	✓

Note: Remote pairing is a Pro feature on the prompter, so remote marker controls come with Pro.

Remote: navigate & edit while paused

Pause the prompter, then steer it and fix the script from your remote device.

1 Pause first

Pause

Navigate and Edit Script are greyed out while the script plays.

2 Navigate

Navigate

Opens a drag strip plus Line and Page up/down buttons that scroll the prompter.

3 Edit Script

Edit Script

Edit the whole script on the remote.

4 Save

✓ Save

The prompter updates, keeping your place and your markers.

Can’t connect? Check these four

Check these on both devices: the one showing the prompter and the one you’re using as the remote.
The remote can be any iPhone or iPad running Steady Prompter.

Allow Remote is on

Open the Remote capsule on the prompter device. If the remote says ‘Looking for prompters...’, turn Allow Remote on.

Devices are close

Keep both devices nearby with Wi-Fi and Bluetooth on.

Re-enter the code

Type the 4-digit code again on the remote device.

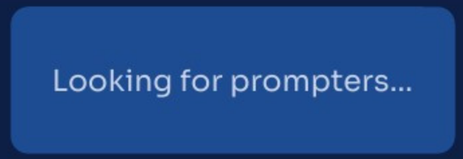

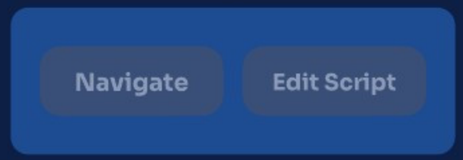

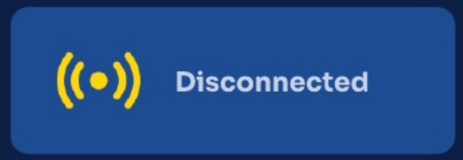

App is up to date

Update Steady Prompter on both devices.

Remote troubleshooting

Fixes for the device you're using as the remote: any iPhone or iPad running Steady Prompter.

	**'Looking for prompters...'**	Turn on Allow Remote on the prompter, keep both devices nearby with Wi-Fi and Bluetooth on, and re-enter the 4-digit code.
	**Navigate / Edit Script greyed out**	They only work while paused. Pause the prompter first.
	**Marker or edit buttons do nothing**	Update Steady Prompter on BOTH devices, then pause the prompter.
	**Remote shows 'Disconnected'**	Turn Wi-Fi back on with the Remote screen open. It reconnects by itself, no code needed.
	**'Script was changed' alert**	Tap Reload to get the latest text. Edits made on the remote are lost.

Upgrade to Pro

Unlock Steady Prompter Pro with a single purchase. Pay once, with no subscription.

$19.99

ONE-TIME PURCHASE

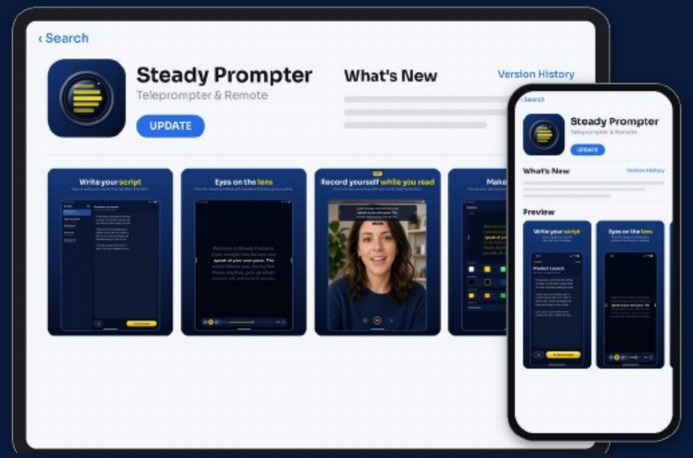

FREE Included

- Unlimited scripts and file import
- Markers with timecodes
